Bazar, Cyrus Troy C

Problems we see

- It annoys us that task division in group projects is often unfair, leaving 1 or 2 people doing all the work.
- I really wish we had a clear way to see who is responsible for which part of the assignment.
- Group chat messages get buried, causing members to forget their assigned tasks and miss deadlines.
- Disorganized group project task delegation and lack of member accountability.

Our dreams

- An automated system where every member gets equal, clear responsibilities, updates their progress effortlessly, and meets deadlines without friction.

Our concerns

- Some group members might still ignore notifications, and setting up complex tracking systems might feel like extra unnecessary work.

How Might We Statement:

- How might we design a visual task-tracking and accountability tool that ensures equal workload distribution and clear deadline tracking for university students working on group projects?

Creative And Critical Thinking EXPLORE-DESIGN CHALLENGE

SCOPES Framework

SCOPES Element	Detail / Content
S — Situation / Problem	Group project tasks are delegated informally, leading to unequal workload, forgotten responsibilities, and missed project deadlines.
C — Constraints	Group members have varying schedules, different technical skill levels, and limited time to learn complex project management tools.
O — Objectives / Outcomes	Fair task distribution, transparent task status for every member, and on-time project submission without interpersonal conflict.
P — People	University students assigned to collaborative coursework and group presentations.
E — Estimates	Free task-management templates/tools (e.g., Trello, Notion, or Canva boards), 1 week for setup and testing.
S — Scope	High flexibility to explore solutions like automated chat reminders, visual boards, or peer-review progress logs.
Design Challenge (HMW)	<i>How might we design a simplified visual task workflow that enables equal delegation and clear accountability for student project groups?</i>
